SEPARATE JUDICIAL DISTRICT.

The members of the Carson bar are agitating the subject of segregating the Second Judicial District, and post routes taken up. putting off Washoo county in a district by itself. They intend to bring the matter before the next Legislature. They say that the interests of litigants demand the change. Most of the business transacted in tho District is Chamber business, and when the Judge is wanted in Carson he is in Rano, and vice versa. We have no idea that the people of this county will object to having Washoo constituted a separate Judicial District. The present district is composed of Washoo, Ormsby and Donglas counties, and the Judge receives a salary of \$5,000 per annum, of which we pay \$2,100, Ormsby the samo, and Douglas #800. If the proposed change is effected we will of course, have to pay our Judge about \$2,500-we think that sum is suffleient. We believe we can stand the increase of \$400, for the benefit we shall derive from being a Distrint by ourselves, and the convenionces that litigants will receive by such a change. The members of the Reno bar will doubtless be in favor of the project. We should like to have an expression of opinion from

A Good Move.

On the 24th of this month the Republican State Convention will be held at Carson. Also, at the same time, a grand ratification moeting will take place. On the 28th, the Democratic State Convention will be held at Virginia City, and in order to accommodate the many who wish to attend both Conventions from the eastern portion of the State, a move is being made to have the C. In the House of Commons last night, Hamilton, Under Secretary for India, made an annual statement of India finances, which the Times pronounces telerably satisfactory. He treats claborately the causes of the depreciation in silver, which he attributed in a great measure to panic,

Mr. Goshar haped the question of the depreciation of silver would receive serious attention. The Government was endeavoring to ascortain the effect of the fall in silver in countries producing that precious metal. He saw no disposition on the part of the countries whose action greatly effected the question to substitute gold for silver currency. Ho asked if the Government had reports os of the vast number in the different as to the steps taken by the United counties in the Great East who wish | States regarding the bills on the subject of silver currency, and statistics agilate this matter and keep the ball of the product of the American mines ending with 1875. Those mines must be watched with great anxiety, The Ragister's thought is father to as we are desirons of forming a correct opinion of the future prices of silver. It has been stated that these mines paid themselves by the gold produced and that silver was practieally produced for nothing. What was the effect on other than American mines of the fall in value of silver? If prices remained at the presont point we must expect to see a deoided falling off in the source of sup-
